

Pharmacy

Track every pharmacy order from Pending Rx to Delivered, fax a signed prescription, and keep the list of pharmacies your clinic uses.

Page manual · For Owners, Managers, Providers · aminova.health/university/pharmacy

1. THE PAGE AT A GLANCE

Open **Pharmacy** in the sidebar. The page is called **Pharmacies**. From the top down: your **Favorites**, a search to **Find a pharmacy**, the **Pharmacies you order from**, and the **Order queue**.

Orders at the top right opens every order. **Rx History** opens your prescriptions.

The screenshot shows the 'Pharmacies' page in the Aminova Health interface. On the left is a dark sidebar with navigation options: Notifications, Dashboard, PATIENTS (Patients, Care Plan, Intake Engine, Consents, Appointments, My Schedule, Labs, Treatment Plans, Clinical Notes), PROTOCOLS (Protocols, E-Prescriptions, Refills), and TEAM (Dr. Alex Rivera, Owner / Director). The main content area is titled 'Pharmacies' and includes tabs for 'Orders' and 'Rx History'. It features a 'Favorites' section with a message 'No favorites yet', a 'Find a pharmacy' search bar, and a 'Pharmacies you order from' section. This section displays two pharmacy cards: 'Empower Pharmacy' (Default, Ships to patient, On file) and 'Hallandale Pharmacy' (Ships to patient, Not on file). Each card shows a list of recent orders with details like medication name, dose, patient name, date, and status (Shipped, Pending Rx, Delivered). At the bottom of the pharmacy cards are buttons for 'View Orders', 'Mark as e-Rx ready', and icons for edit, delete, and close.

Pharmacies: favorites, search, and the pharmacies you order from.

Tip. Adding or starring a pharmacy only saves it to your list. It doesn't link Aminova to that pharmacy.

2. THE ORDER QUEUE

1. Scroll down to **Order queue**. Each row shows the patient, the medicine and dose, the pharmacy, the amount and where the order stands.

2. An order moves through **Pending Rx**, **Sent to Pharmacy**, **In Production**, **Shipped** and **Delivered**.
3. The amber number next to the heading counts orders still at **Pending Rx**.
4. Click a row to see its details: the medicine, dose, pharmacy and tracking number. **View in Orders** opens the order itself.

Peak Vitality Clinic Growth Plan Notifications 9+ Dashboard NTS Patients Care Plan Intake Engine 5 Consents Appointments My Schedule Labs Treatment Plans Clinical Notes ocols Protocols E-Prescriptions Refills Dr. Alex Rivera Owner / Director	EW	Jun 21, 2026	5 mg	Olympia Pharmacy	\$499	Shipped

	JJ	James Jackson Jun 9, 2026	Tirzepatide × 3 5 mg	Olympia Pharmacy	\$499	Delivered

The order queue: every pharmacy order and where it stands.

3. MOVE AN ORDER ALONG

1. On a **Pending Rx** order, click **Fax to pharmacy**. The signed prescription is faxed to the fax number you saved for that pharmacy, and the order moves on.
2. When you see **In Prod**, click it once the pharmacy is making the order.
3. When it leaves the pharmacy, click **Ship**. If the patient uses the app, they get a notice there that it has shipped.

T	STATUS	ACTION
	 Shipped	
	 In Production	 Ship
	 In Production	 Ship
	 Shipped	
	 Delivered	
	 Delivered	

The button on each order changes as the order moves along.

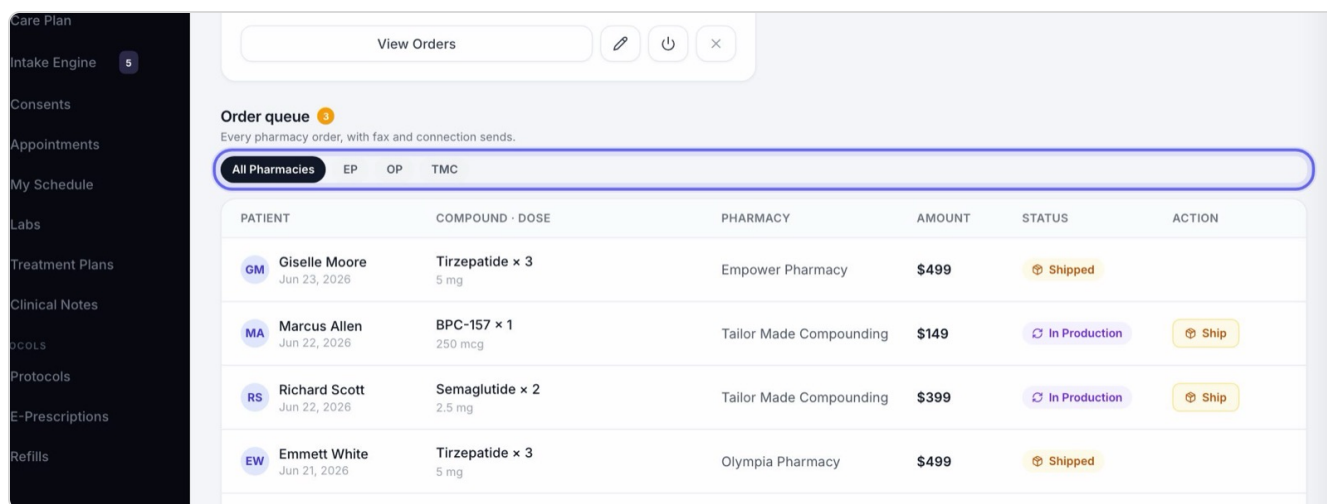

Tip. If this prescription was already faxed, you're asked before a second copy goes. If it can't be faxed, you're told why and nothing is sent.

4. BEFORE YOU FAX

1. Only people who can prescribe can fax a prescription.
2. The order needs a prescription attached. If it has none, the fax button is grayed out.
3. The pharmacy needs a fax number on file. Add it with the pencil on the pharmacy's card.
4. In training mode nothing is sent. You'll see a note that the fax was only practiced.

5. ONE PHARMACY AT A TIME

1. Above the queue, click a pharmacy's short name to see only its orders.
2. Click **All Pharmacies** to see everything again.

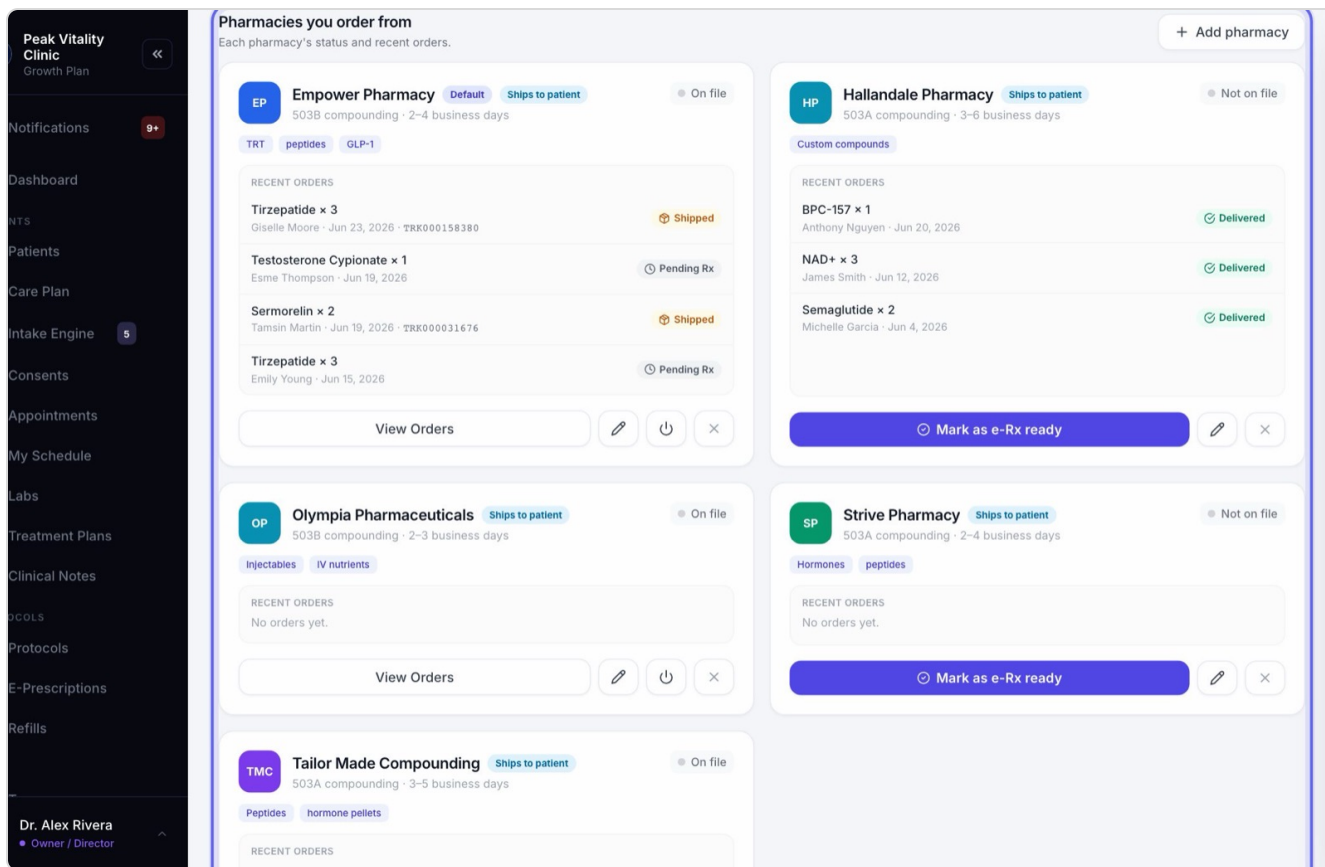

The screenshot shows a web application interface for viewing orders. On the left is a dark sidebar with navigation links: Care Plan, Intake Engine (5), Consents, Appointments, My Schedule, Labs, Treatment Plans, Clinical Notes, Records, Protocols, E-Prescriptions, and Refills. The main area has a 'View Orders' header with edit, power, and close icons. Below is an 'Order queue' section with a note 'Every pharmacy order, with fax and connection sends.' and a filter bar with 'All Pharmacies' (selected), 'EP', 'OP', and 'TMC'. The table below lists four orders:

PATIENT	COMPOUND · DOSE	PHARMACY	AMOUNT	STATUS	ACTION
GM Giselle Moore Jun 23, 2026	Tirzepatide × 3 5 mg	Empower Pharmacy	\$499	Shipped	
MA Marcus Allen Jun 22, 2026	BPC-157 × 1 250 mcg	Tailor Made Compounding	\$149	In Production	Ship
RS Richard Scott Jun 22, 2026	Semaglutide × 2 2.5 mg	Tailor Made Compounding	\$399	In Production	Ship
EW Emmett White Jun 21, 2026	Tirzepatide × 3 5 mg	Olympia Pharmacy	\$499	Shipped	

Each button is one pharmacy's short name.

6. PHARMACIES YOU ORDER FROM

1. Compounding pharmacies, and pharmacies that only take faxed prescriptions, are listed here.
2. Each card says **Local pickup** or **Ships to patient**, its type and turnaround, and shows its four latest orders.
3. **Fax only** means prescriptions to it go by fax from the order queue, never electronically.
4. **View Orders** jumps to its orders in the queue. The pencil edits the pharmacy. The **X** removes it from your list.

Pharmacies you order from, each with its latest orders.

7. ADD A PHARMACY

1. Click **Add pharmacy** next to **Pharmacies you order from**.
2. Use it for a compounder, a pharmacy that only takes faxed prescriptions, or one the search can't find. For any other pharmacy, search for it and star it instead.
3. Type the **Pharmacy Name** and pick its **Type**. The line under the type says whether patients pick up in person or it ships to them.
4. Add the **States Licensed**, **Avg Turnaround** and **Specialties** if you like.

Add pharmacy, next to the pharmacies you order from.

8. FAX ONLY, OR WITH ITS NCPDP ID

1. Under **Pharmacy Identifiers**, type the pharmacy's 7-digit **NCPDP ID** if it has one. It is needed to send prescriptions electronically.
2. For a pharmacy that only takes faxed prescriptions, leave the NCPDP ID blank and fill in **Fax** under **Primary Contact**. Without an NCPDP ID, the fax number is required.
3. The address is optional. Patients see it for pickup orders.
4. Click **Add Partner**. It stays grayed out until the pharmacy has a name and either an NCPDP ID or a fax number.

Jun 4, 2026

Mark as e-Rx ready

The NCPDP ID sends electronically. Leave it blank for a fax-only pharmacy.

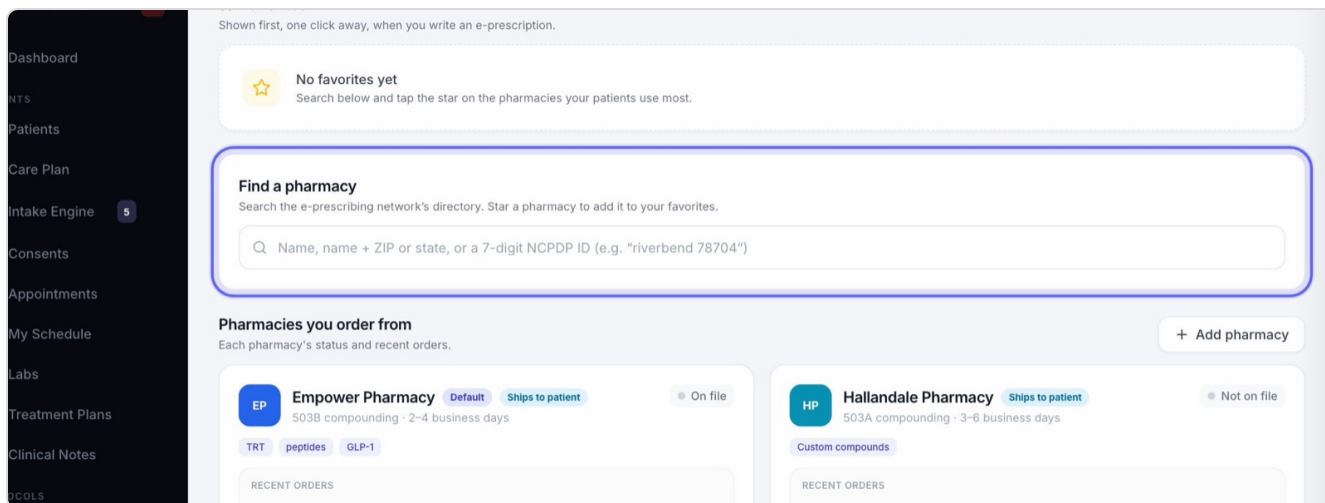

Tip. A pharmacy with an NCPDP ID that isn't a compounder shows under Favorites. Compounders and fax-only pharmacies show under Pharmacies you order from.

9. FAVORITES

1. Favorites are your go-to pharmacies, at the top of the page.
2. They show first, one click away, when you write an e-prescription.
3. Each card has the address, the type, the phone number and the NCPDP ID.
4. Click the gold star on a card to take it off your favorites.

10. FIND A PHARMACY

1. Under **Find a pharmacy**, type a name, a name with a ZIP code or state, or a 7-digit NCPDP ID.
2. Results come from the e-prescribing network's directory, with the address, phone and NCPDP ID.
3. Tap the star to add a pharmacy to your favorites. Tap it again to take it off.
4. If a pharmacy can't be added, the reason shows under it.

Search the directory, then star the pharmacies your patients use.

Tip. The search works once your e-prescribing is set up. Until then it tells you so.

11. IF YOU CAN'T SEE A BUTTON

The search, the stars, **Add pharmacy** and the edit buttons are for roles that manage operations, like owners and managers. Everyone who can open the page can see the lists and the queue.
