

# Products

Everything you sell, and what you charge for it. Add compounds, services, supplies and supplements, set their cost and price, and see every patient order.

Page manual · For Owners, Managers, Providers · [aminova.health/university/products](https://aminova.health/university/products)

## 1. THE PAGE AT A GLANCE

Products is your price list. Two tabs sit at the very top: **Catalog**, which is everything you sell, and **Orders**, which is every patient order.

On the Catalog, the line under the title counts your active and archived products. Your list is on the left, and the product you pick opens on the right. **Import CSV** and **Add Product** sit in the top right.

The screenshot displays the AminoVA Health Products Catalog interface. The interface is split into two main sections. On the left is a sidebar with navigation options like Notifications, Dashboard, Patients, Care Plan, Intake Engine, Consents, Appointments, My Schedule, Labs, Treatment Plans, Clinical Notes, Protocols, E-Prescriptions, Refills, and a user profile for Dr. Alex Rivera. The main content area is titled 'Products' and shows a list of products on the left and a detailed view of a selected product on the right. The product list includes items like Botox, BPC-157, Dysport, Juvéderm Ultra XC, Kybella, NAD+, Restylane Lyft, and Sculptra, each with its price and status. The detailed view for Botox shows its cost price (\$4.10), sell price (\$12.00), margin (66%), and other details like source, DEA schedule, and inventory status.

Products: your catalog on the left, one product opened on the right.

**Tip.** The two small buttons beside Import CSV switch between the split view and a full-width list.

## 2. ONE KIND AT A TIME

1. Click **Compounds**, **Services**, **Supplies** or **Supplements** to see only that kind. **All** shows everything.

2. **Memberships** holds your memberships and packages.

3. The number on each tab is how many there are.

The screenshot displays the 'Peak Vitality Clinic' software interface. On the left is a dark sidebar with navigation options: Notifications (9+), Dashboard, Patients, Care Plan, Intake Engine (5), Consents, Appointments, My Schedule, and Labs. The main area is titled 'Products' and shows '32 active · 0 archived · 32 total in catalog'. Below this is a filter bar with tabs: All (32), Compounds (13), Services (11), Supplies (0), Supplements (8), and Memberships (2). A search bar labeled 'Search products...' is present. Below the search bar, a list of products is shown: Botox (\$12.00), BPC-157 250mcg (\$149.00), and Dysport (\$4.50). Each product entry includes a checkbox, a product icon, the name, price, and status (Active). The Botox entry also shows 'Compound', 'Rx', 'Injectable', and 'Active' tags. To the right of the product list, a detailed view for Botox is shown, including 'Cost Price \$4.10 per unit', 'Sell Price \$12.00 per unit', and 'Margin 66% gross'. The interface also includes an 'Import CSV' button and 'Edit' and 'Duplicate' buttons for the selected product.

The kinds of product, with how many of each.

### 3. YOUR CATALOG

1. Type in **Search products...** to find one by name or description.
2. Each row shows the name, price, kind and status. **Rx** means it needs a prescription.
3. An amber **Low** or **Out** tag means its stock is running short on the Inventory page.
4. Click a row to open it. The small box icon that appears on hover archives it.

#### 4. ONE PRODUCT, OPENED

1. The top shows its name and tags: its kind, **In-house** or **Pharmacy-routed**, and **Rx Required** if it needs a prescription.
2. **Edit** changes it. **Duplicate** makes a copy, saved as a draft.
3. **Archive** hides it from use but keeps the record. **Delete** removes it for good, after you confirm.
4. Lower down: its prescription details, whether it is taxed, the protocols that use it, and its stock.

Edit, Duplicate, Archive or Delete the product you opened.

**Tip.** Archive anything you have sold before. Delete is for a product added by mistake.

## 5. COST, PRICE AND MARGIN

**Cost Price** is what one unit costs you. **Sell Price** is what you charge. **Margin** is the share of the price you keep, and turns green at 40% or more.

When the product is linked to your stock, a box at the bottom shows its SKU and how many are on hand. **Open in Inventory** takes you to it.

What it costs you, what you charge, and the margin you keep.

## 6. ADD A PRODUCT

1. Click **Add Product**.
2. Pick the kind at the top: **Compound**, **Service**, **Supply** or **Supplement**.
3. Under **Name**, search the drug list or type your own. Picking a drug fills in its strengths, form, directions and schedule.
4. Add a **Description** if you like, and set the **Status**: **Active**, **Draft** or **Archived**.
5. Tap any **Linked Protocols** that use it.

Add Product: pick the kind, then name it.

**Tip.** Type a controlled drug's name and it is marked Rx with its schedule. Type a supplement's name and it is filed as a supplement.

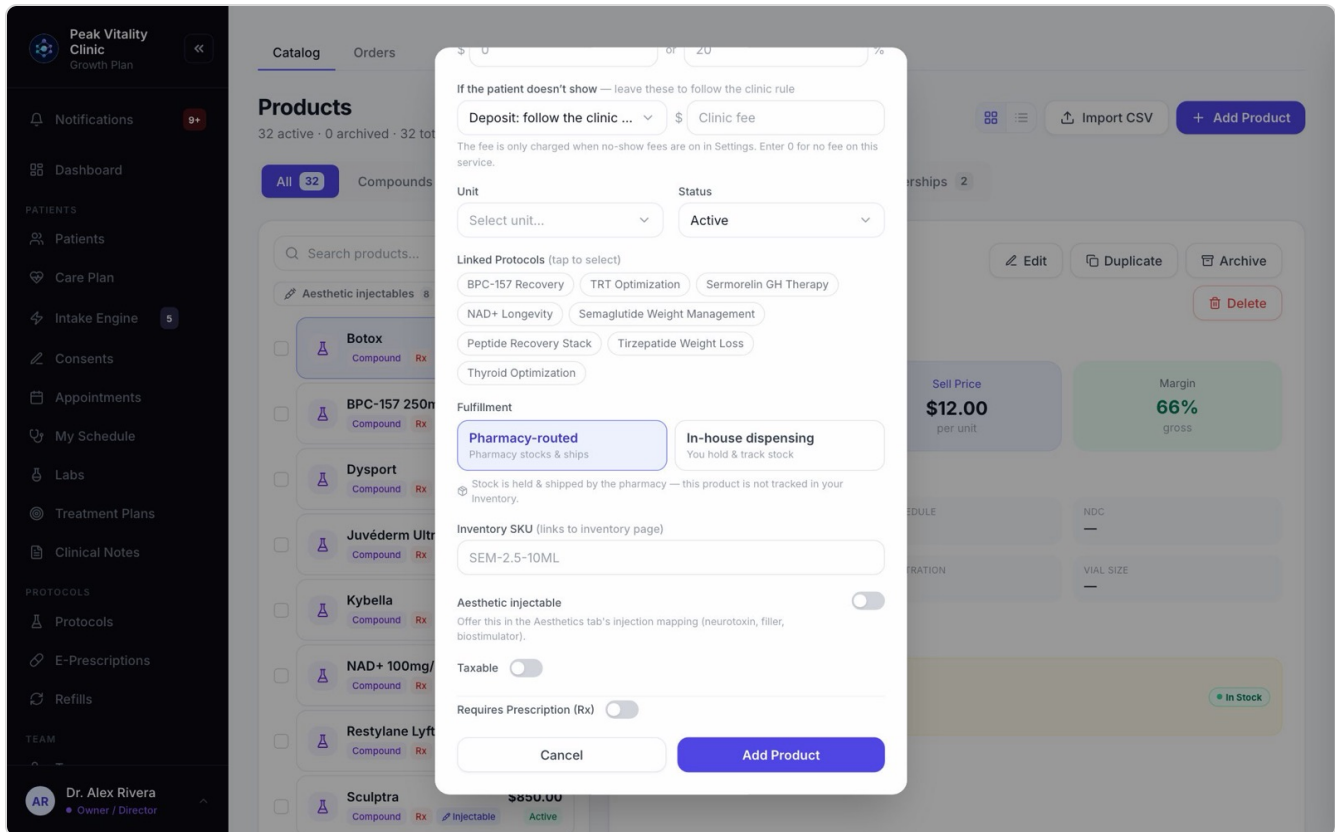

## 7. PRICE AND DEPOSIT

1. Type the **Cost Price (\$)** and the **Sell Price (\$)**. A sell price of 0 is fine for a free service.
2. Bought by the vial but sold by the mL? Fill in **Bought by the container**: the **Container**, the **Amount per container** and the **Cost per container (\$)**. The cost of one unit is worked out for you.
3. **Deposit to book** is what a patient pays to hold a visit for this service. Type dollars or a percent. Leave it blank to use your clinic's usual deposit.
4. **If the patient doesn't show** sets this service's own no-show rule. Leave it to follow the clinic rule.
5. Turn on **Taxable** if it is taxed, and add a **Tax Code** if you use one.

## 8. STOCK AND WHERE IT COMES FROM

1. Pick the **Unit** it is counted in, like vial, mL or bottle.
2. Under **Fulfillment**, choose **Pharmacy-routed** if a pharmacy holds and ships it, or **In-house dispensing** if you keep it on your own shelf.
3. An in-house product gets its own row on the Inventory page when you save it.
4. **Inventory SKU** is the code that ties the product to its row on the Inventory page. A service has no SKU.

5. Turn on **Aesthetic injectable** to offer it on a patient's Aesthetics tab.

Fulfillment: a pharmacy ships it, or you keep it on your own shelf.

## 9. PRESCRIPTION DETAILS

1. Turn on **Requires Prescription (Rx)**. More fields open.
2. Fill in the **Source Type**, **DEA Schedule**, **NDC**, **Strengths (e-Rx dropdown)**, **Form**, **Concentration** and **Vial Size**.
3. Add the **Default Sig**, the directions prescribers start from.
4. For a compound, add each ingredient under **Compound formula**.
5. Press **Add Product**. Editing one later, the button says **Save Changes**.

**Tip.** A prescription product needs an NDC or a strength before it saves.

## 10. AESTHETIC INJECTABLES

1. Click **Aesthetic injectables** above the list. It shows only the products offered on a patient's Aesthetics tab. The number is how many.
2. To mark several at once, tick the boxes beside them. Then press **Mark as injectable** or **Remove mark**.
3. Nothing marked yet? **Add the common injectables** adds them as drafts. Set a price on each.

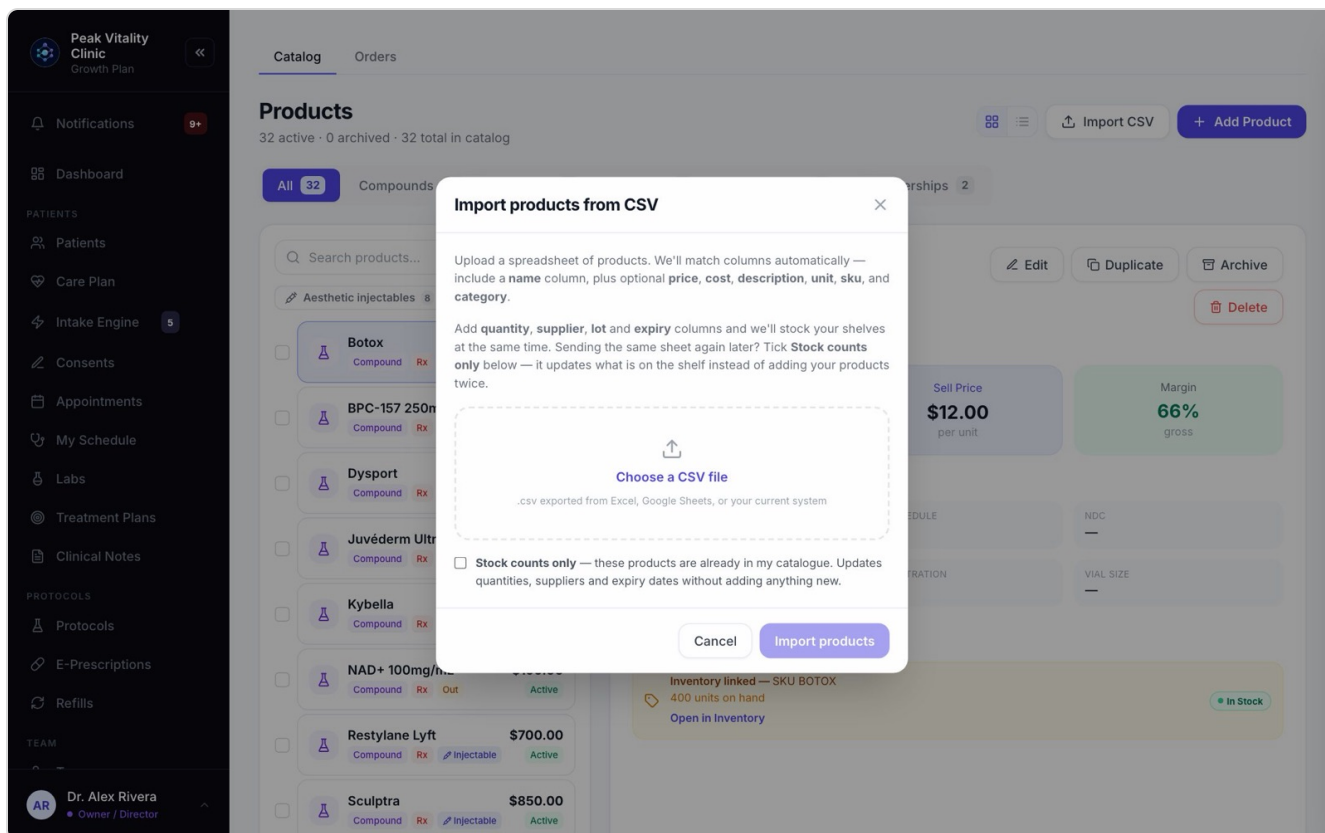

The screenshot displays the 'Aesthetic injectables' section of the Aminova Health LLC product management system. On the left, a dark sidebar contains navigation links. The main header shows filters for 'All' (32), 'Compounds' (13), 'Services' (11), 'Supplies' (0), 'Supplements' (8), and 'Memberships' (2). Below this is a search bar and a filter for 'Aesthetic injectables' (8). A list of products is shown, including Botox, BPC-157 250mcg, Dysport, Juvéderm Ultra XC, and Kybella, each with a checkbox, icon, name, price, and status. On the right, a detailed view for Botox is shown, including its status (Active), type (Compound, In-house, Manufactured), cost price (\$4.10 per unit), and sell price (\$12.00 per unit). Below this, fields for 'RX & PHARMACY' (SOURCE: Manufactured, DEA SCHEDULE: None, STRENGTH: —, CONCENTRATION: —) are visible.

| Product           | Price    | Status |
|-------------------|----------|--------|
| Botox             | \$12.00  | Active |
| BPC-157 250mcg    | \$149.00 | Active |
| Dysport           | \$4.50   | Active |
| Juvéderm Ultra XC | \$650.00 | Active |
| Kybella           | \$600.00 | Active |

Aesthetic injectables: what the Aesthetics tab offers.

## 11. IMPORT A LIST

1. Click **Import CSV**.
2. Use a spreadsheet with a name column. Price, cost, description, unit, SKU and category columns are optional.
3. Add quantity, supplier, lot and expiry columns to stock your shelves at the same time.
4. Press **Choose a CSV file**, check the preview, and import.
5. Sending the same sheet again later to update counts? Tick **Stock counts only**, so nothing is added twice.

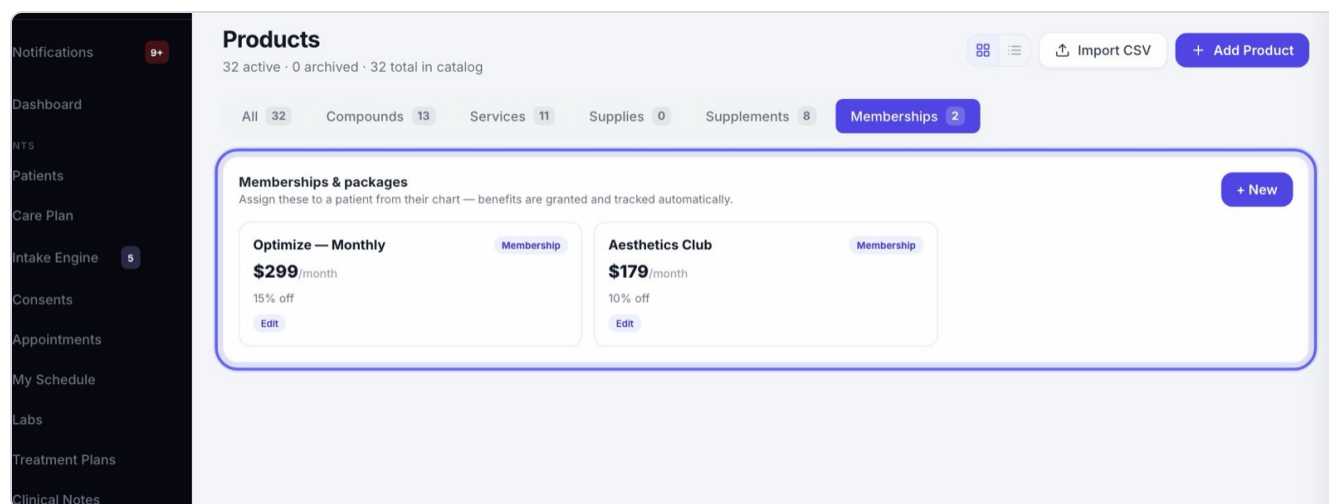

Import a whole product list from a spreadsheet.

## 12. MEMBERSHIPS AND PACKAGES

The **Memberships** tab lists your plans. A membership bills on repeat. A package is paid once and counts down as it is used.

Press **+ New** to make one, or **Edit** on a plan to change it. You give a plan to a patient from their chart.

Memberships & packages: every plan you sell, with its price and what it includes.

## 13. ORDERS

1. Click **Orders** at the top of the page.
2. The numbers show all orders, pending, in transit and delivered. Click one to show only those.
3. Search by patient, item or order ID, or use the status buttons.
4. Each order's ... menu moves it along: **Mark Processing**, **Mark Shipped** or **Mark collected**, then **Mark Delivered**. It also holds **Put On Hold**, **Edit Order** and **Cancel Order**.
5. **New Order** starts one by hand. **Export** downloads the list.
