

Suggestions

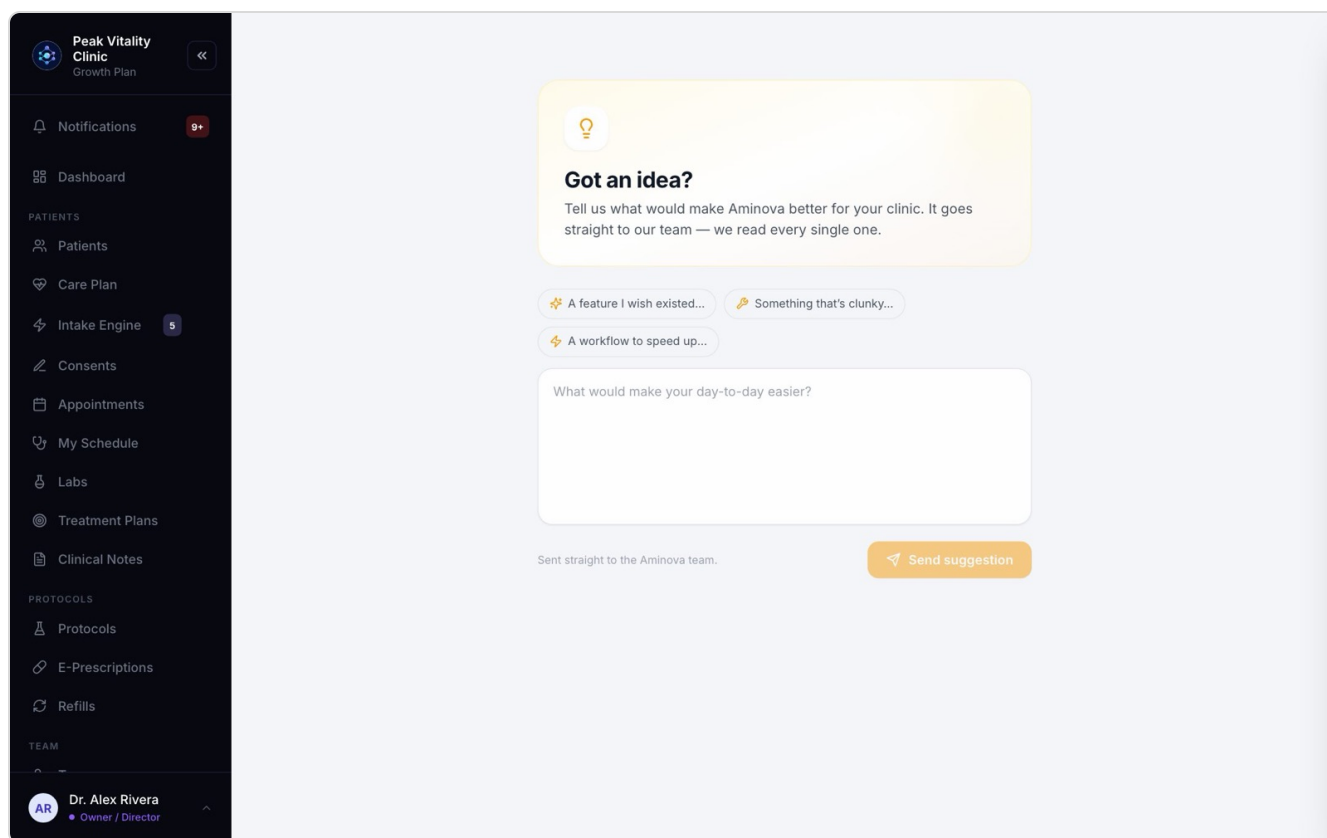

Tell the Aminova team what would make Aminova better for your clinic. It goes straight to us.

1. THE PAGE AT A GLANCE

Open **Suggestions** under **Help**, at the bottom of the sidebar.

At the top it asks **Got an idea?** Under that are three idea starters, a box to write in, and **Send suggestion**.

The Suggestions page.

2. WHAT TO SEND

Anything that would make your day easier: a feature you wish you had, a screen that feels clunky, or a job that takes too many clicks.

For a question about how to do something, the **AI Assistant** is quicker.

3. NEED A START?

Click **A feature I wish existed...**, **Something that's clunky...** or **A workflow to speed up...** to begin your idea with those words. They only fill an empty box.

The screenshot shows a web form titled "Got an idea?". Below the title is a paragraph: "Tell us what would make Aminova better for your clinic. It goes straight to our team — we read every single one." Below this is a row of three buttons: "A feature I wish existed...", "Something that's clunky...", and "A workflow to speed up...". The first button is highlighted with a blue border. Below the buttons is a large text input box with the placeholder text "What would make your day-to-day easier?". At the bottom left of the form, it says "Sent straight to the Aminova team." and at the bottom right is an orange button labeled "Send suggestion".

Click a starter to begin your idea with it.

4. WRITE YOUR IDEA

1. Type in the box that asks **What would make your day-to-day easier?**
2. A feature you wish you had, or something that feels slow. Say what you'd like to happen.
3. Leave out patient details. Describe the problem, not the person.

Straight to our team — we read every single one.
